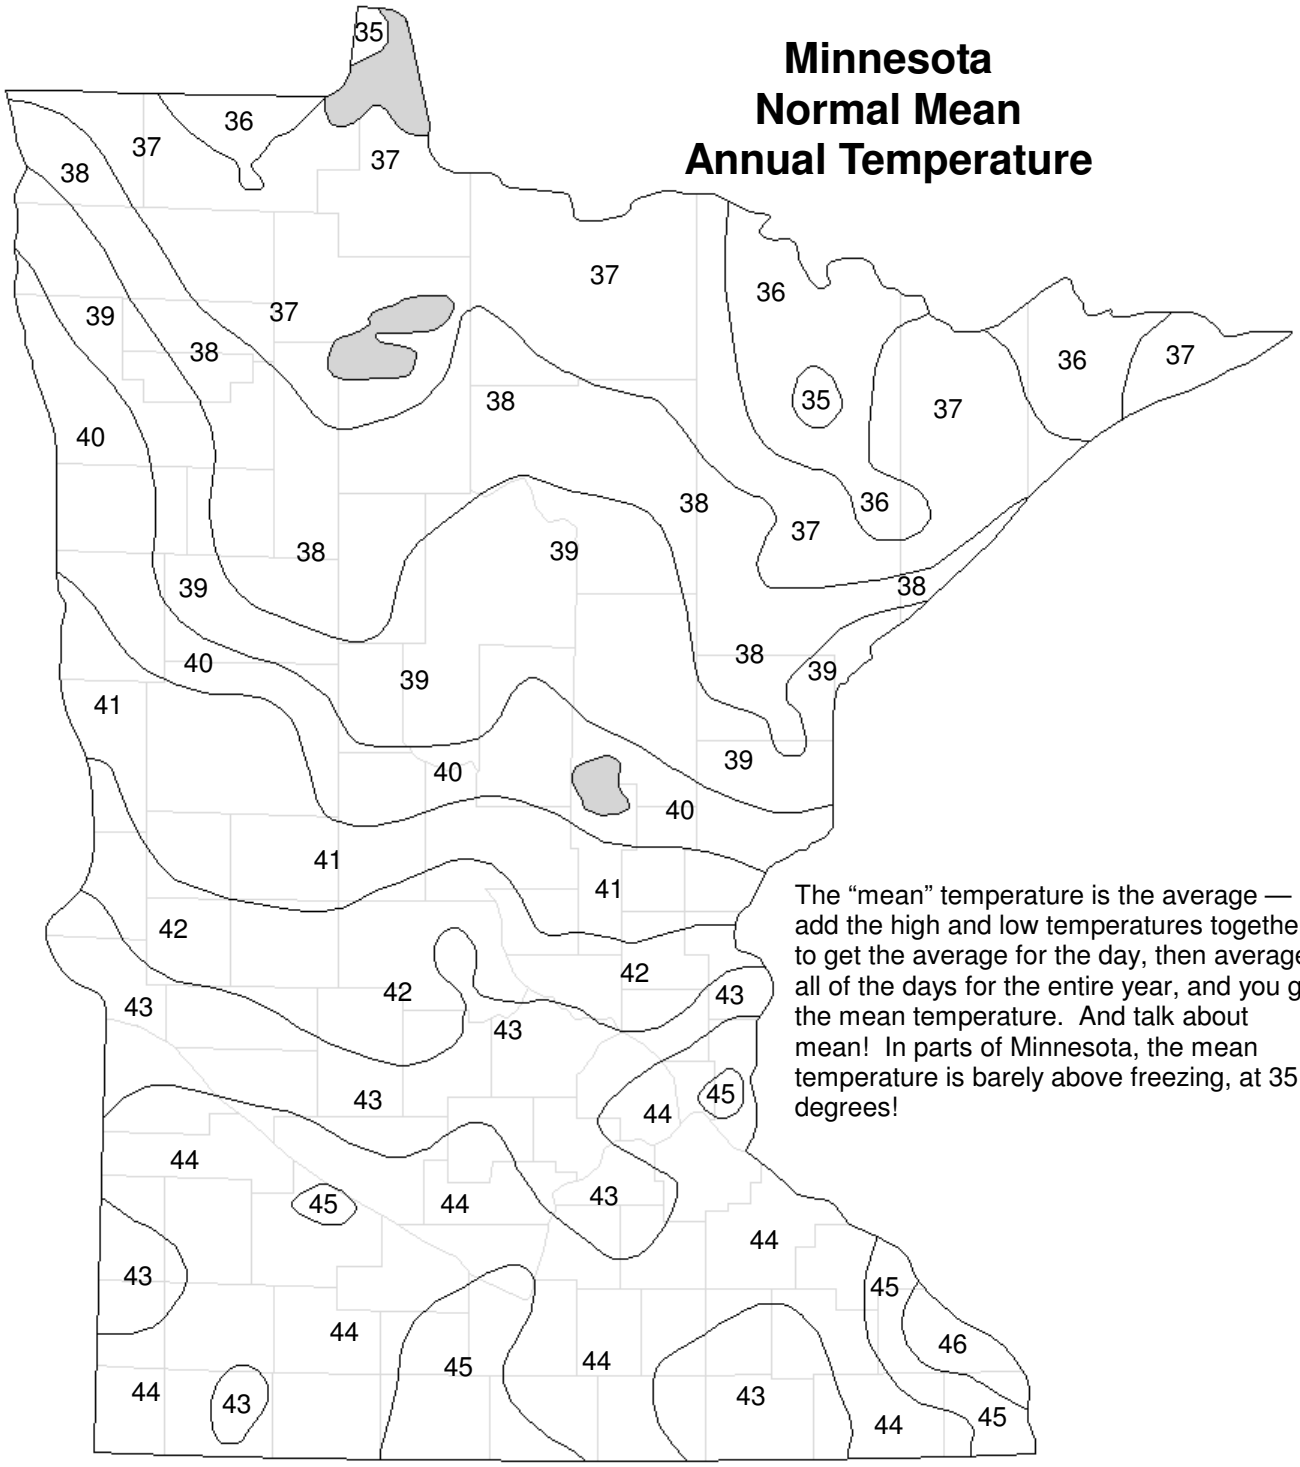
Name: _____

Minnesota
Normal Mean
Annual Temperature



The “mean” temperature is the average — add the high and low temperatures together to get the average for the day, then average all of the days for the entire year, and you get the mean temperature. And talk about mean! In parts of Minnesota, the mean temperature is barely above freezing, at 35 degrees!

Normal Mean Annual Temperature
(degrees F)

46	**40**
45	**39**
44	**38**
43	**37**
42	**36**
41	**35**
